

roundflash™ - Strip Light

The collapsible striplight diffuser for most remote controlled speedlights.

For best results set the flash zoom at min. 85 mm manually.

For set-up: Attach a stand to the flash and tilt the flash head up. Insert the flash head into the hole and fasten the elastic rope around the hinge. Secure the grip by placing the stand inside the loop.

Hang the set using the elastic rope on the top.

To connect two RoundFlash™ Strip Lights: pass an elastic rope through the stopper of the second RoundFlash™ Strip Light. Do the same with other elastic rope and then fasten both ropes.
